

PCs for Esports

• PCs for Whole Teams • Bespoke Designs • UK Support

LOGIX builds and delivers high-spec bespoke esports systems designed not only for players, but the full stack of esports operations.

Esports is no longer about players and tournaments alone. Behind every win is a team of developers, broadcasters, shoutcasters and analysts. LOGIX builds desktops that serve every corner of the esports ecosystem — from gameplay to game dev, from training to Twitch.

Featuring Edge AI, high-frequency multi-core processors, powerful NVIDIA RTX or AMD Radeon graphics cards, ultra-fast DDR5 memory, and advanced cooling solutions, our PCs ensure smooth gameplay, low latency, and high frame rates. Built in the UK with premium components, LOGIX systems don't just play the game - they support everyone who creates, broadcasts, and wins it.

LOGIX designs and builds for all team members:

Players & Training

Edge AI tracks gameplay patterns, provides realtime insights and tunes performance dynamically - no Cloud needed.

Coaches & Analysts

Local AI dashboards to access player metrics like APM, accuracy and map efficiently. Export the results for coaching.

Designers & Dev Students

High-performance PCs built for Unreal, Unity, Blender & modding, with AI-assisted rendering and local asset management.

Broadcasters & Streamers

Smooth 1440p & 4K streaming with on-device encoding and AI tools for audio mixing, facial tracking, scene transitions and stream overlays.

Announcers & Shoutcasters

Multitask with ease: run voice software, match feeds, notes and highlights on a quiet, reliable rig that won't drop frames mid-broadcast.

Public & Teaching Labs

Consistent builds for classrooms and competitions. Use Edge AI modules to track individual progress and group performance over time.

✓ Role-specific solutions ✓ Scalable setups ✓ On-site repairs & replacements

PCs for Esports

We work with you to design and build PCs to meet the demands of modern esports environments, whether you're training the next generation of players or upgrading your streaming and broadcasting capabilities.

Expertly Designed, Passionately Built, Rigorously Tested

We work with your requirements and team aspirations to design and develop LOGIX PCs that deliver powerful, reliable performance.

By harnessing the latest technology such as Edge AI, and validating stability through industry-leading tools like OCCT stress testing, we ensure every system gives you a measurable advantage.

Each PC is purpose-built for its role and its user, whether that's playing, creating, broadcasting, or any other demanding workload.

Our Partners - LOGIX only builds with branded components & software

We work with globally-recognised brands that align with our own standards, ensuring every single component and finished PC is built for longevity, reliability and unmatched performance whether you're playing, editing, broadcasting or marketing.

AI Integration

Use Edge AI and Microsoft Copilot to train, develop, record and broadcast efficiently.

3-Year Warranty

Every PC comes with a sustainability-focused 3-year warranty and on-site swapouts.

Hand-Built in the UK

Built and thoroughly tested by our team of engineers at our facility in Yorkshire.

UK-Based Customer Support

No call-centres or chatbots, just real people helping you get the most from your PC.

ITAD & Recycling

We can also collect and recycle unwanted devices to support your ITAD efforts.

AMD  Antec  GIGABYTE

intel  Kingston  Microsoft
