

PCs for Security

• Hand-built in the UK • 3 Year Warranty • UK Support

When it comes to security and monitoring, reliability is essential. The PCs powering these systems must be robust, efficient, and built to perform without interruption.

Your security and monitoring systems have to be reliable, so the PCs running them have to be just as robust.

At LOGIX, we collaborate closely with leading hardware and security software providers to ensure our PCs are optimised for surveillance and security. This partnership allows us to tailor PCs to meet the specific requirements of advanced CCTV, fire and security systems, every one stress-tested for up to 12 hours to ensure powerful, efficient and reliable monitoring for years.

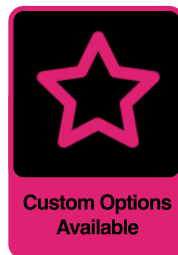

The LOGIX range of full-size, discreet small form-factor and monitor-attached PCs is designed to offer feature-rich options, including the latest AI technologies and support for up to 4 monitors/ 64 cameras, regardless of specification or space requirements. Add in UK customer support and on-site swapouts in the event of anything going wrong, and you've got versatile security PCs with peace-of-mind built-in.

Security, & CCTV monitoring PCs that are also powerful work PCs.

Why pay for another PC to work from when you could be using the one running your security systems? Many businesses don't have that many cameras or a large security presence, so a dedicated machine controlling them is unnecessary.

LOGIX PCs feature powerful Intel and AMD processors, Microsoft Copilot, plenty of storage and fast, reliable memory, designed to do all that security work for you AND act as your everyday PC too, with Windows 11 Pro installed by default.

They are completely free of bloatware and updated with the latest security patches and drivers during the build process. They are also available with both wired and wireless connections to suit your own security protocols.

✓ All-branded components ✓ Scalable office setups ✓ On-site repairs & replacements

PCs for Security

Tried-and-tested, branded components, a rigorous testing procedure and the ability to upgrade are all standard features in the LOGIX range - so you can run and monitor your security systems in confidence.

- 8GB memory, 250GB NVMe SSD storage
- Windows 11 Pro with Microsoft Copilot AI Assistant
- 3-year parts and collection warranty

CUSTOM OPTIONS Whilst our entire range has been designed after a lot of research, we understand you may need something different - and that's not a problem. Speak to us about your requirements and we will design a bespoke solution based on what you'll be using your PCs for and ensure it's futureproofed, tested and ready-to-go straight from the box.

AI Integration

Use Microsoft Copilot for facial recognition, activity prediction and advanced monitoring.

3-Year Warranty

Every PC comes with a sustainability-focused 3-year warranty and on-site swapouts.

Hand-Built in the UK

Built and thoroughly tested by our team of engineers at our facility in Yorkshire.

UK-Based Customer Support

No call-centres or chatbots, just real people helping you get the most from your PC.

Windows 11

All LOGIX PCs are built and tested with Windows 11 installed, complete with the latest security updates and drivers, meaning they are ready to integrate into your existing systems. However, we can work with your IT department and provide PCs OS-free if you would prefer.

ITAD & E-waste Recycling

As part of the LOGIX warranty, we offer institutions on-site replacements and device recycling. In the unlikely event of a failed PC, we will arrange a replacement machine, delivered to site. We can also arrange the collection and recycling of unwanted devices to support your ITAD efforts.
